 - Remove Your Cluster(s) 1
 - Optional: Delete the Cluster 2

Remove Your App and Cluster

After you are done exploring the functionality of the Project Astra beta program, you will want to remove your assets from the service.

Deregister Your App(s)

Go to **Apps**, then click your app to select it. Click to expand the actions menu, then click **Deregister**.

The screenshot shows the 'Apps' page in the Google Cloud console. At the top, there's a header with 'Apps' and a search bar. Below the header, there's a filter bar with 'All clusters' and 'Search'. The main table has columns: Name, Labels, Ready, Compute, Type, Group, and Actions. The first row shows 'testdb-clone2' with 'no labels', a green checkmark, 'astra-cluster-1', 'Kubernetes', and 'namespace:testdb-clone2'. The 'Actions' menu is open, showing options: 'Available', 'Snapshot', 'Backup', 'Clone', and 'De-register'. The 'De-register' option is highlighted with a yellow box.

This ends your app being managed by Project Astra. It does not remove the app from your cluster.

Remove Your Cluster(s)

Go to **Compute**, then click your cluster to select it. Click to expand the actions menu, then click **Remove cluster**.

The screenshot shows the 'Compute' page in the Google Cloud console. At the top, there's a header with 'Compute' and a search bar. Below the header, there's a filter bar with 'All clusters' and 'Search'. The main table has columns: Cluster name, Labels, Type, Version, Region, Create, and Actions. The first row shows 'astra-cluster-1' with 'no labels', 'Kubernetes', 'v1.17.5-gke.9', 'us-central1', and '2020/0'. The 'Actions' menu is open, showing options: 'Available' and 'Remove cluster'. The 'Remove cluster' option is highlighted with a yellow box.

This removes your cluster from Project Astra. It does not delete the GKE cluster from your Google Cloud Platform (GCP) account.

Optional: Delete the Cluster

To fully delete the cluster, log in to the [Google Cloud Console](#). Go to **Kubernetes Engine > Clusters**, then click **Delete** for the cluster you wish to delete.
